

**2012 Sewer Video and Pipe Cleaning Services
Nashua, New Hampshire
Division of Public Works
Engineering Department**

**Addendum Number 1
IFB1056H-012712**

Date Issued: January 20, 2012

Question and Answers from Contractors:

1. Is a bond required for this project?

Answer: No.

2. Is the project subject to prevailing wage rates

Answer: No.

3. Have GIS maps of the sewer video locations been sent?

Answer: Yes, these maps were e-mailed as PDF files to interested companies. However, due to the size of the file (5MB), it is not clear if every company was able to properly open or receive this file. Any company that could not open the file may pick up a printed copy in our office.

Revisions, Clarifications to the Contract Specifications and Contract Documents

1. Both the Contract (Article 2) and the Instructions to Bidders state that all work must be completed, including final reports and videos, by May 4, 2012. While that date remains in effect, certain streets must be videoed prior to May 4th in order that City can verify if there any issues with the sewer that may affect another project. Attached is a list of streets and the dates the street needs to be completed by. We are not requiring a written report on the sewer condition by the requested date, but do want to have the sewer video as well as any concerns discussed with the City by the video technician or company contact person. There are 3 dates shown on the attached list, four streets to be completed by March 9th, 7 streets by March 23rd, and the remainder no later than May 4th.
